Ivan Bongiovanni

Tucumán, Argentina - [Email](#) - [Portfolio](#) - [GitHub](#)

PROFESSIONAL SUMMARY

Front End and Full Stack Developer specialized in React, Next.js, and TypeScript, with more than 2 years of experience.
I implemented scalable interfaces, modern architecture, and performance optimizations in web applications.
I integrated artificial intelligence using the Vercel AI SDK for generative AI.
Experience with React Server Components, different rendering strategies, deployments in cloud environments such as Vercel, and application protection with Vercel Firewall.

EXPERIENEC

Front End Developer

Aliva Shop   Jun 2025—Present, Tucumán, Remote
- Led the migration from Angular 15 to 20 and Ionic 5 to 8, reducing technical debt and improving maintainability.
- Implemented new features using Signals, Input/Output, and HttpResource.
- Migrated Cordova to Capacitor and updated plugins to improve mobile stability.
- Implemented geolocation for both web and mobile, push notifications, and connection state management.
- Refactored critical modules, improving architecture, performance, and user experience.

Full Stack Developer

Tensolite   Jul 2023—Nov 2023, Tucumán, Hybrid
- Developed features with React and Node.js to automate operational processes.
- Implemented bulk data upload and download in Excel, reducing human errors by approximately 90%.
- Generated automatic PDFs with dynamic data, optimizing administrative time.
- Managed global state using Redux and Zustand.
- Built interfaces based on Figma designs.
- Optimized code and improved performance across multiple modules.
- Implemented image upload and visualization.
- Implemented technical SEO using Open Graph metadata and Twitter Cards, optimizing the visualization of shared links on social media, improving card presentation, and increasing website visits.
